

External Deburr/Chamfer Tool 3 - 19mm

The chamfer tool is designed to be used with an electric drill and is fitted with a 1/4" quick-chuck shaft, maximum recommended speed is 400rpm. The tool is fitted with three super-hard High Speed Steel blades that make light work of repairing damaged bolts and damaged threads. The blades cut quickly and cleanly and are effective on stainless steel, hardened steel, mild steel, copper, brass, wood, fibreglass, and even hard plastic. Bolts, studs and threaded rod, size range from 3mm right up to 19mm. Hammer-damage or squashed and flattened threads will stop the retaining nut or wheel nut screwing back on; a couple of zaps from the deburr/chamfer tool solves the problem instantly.

Additional Information

- Effective on stainless steel, hardened steel, mild steel, copper, brass, wood, fibreglass, hard plastic.
- Size range 3 - 19mm; max speed 0 - 400rpm.
- HSS blade 1/4" shank. Chamfer angle: 50 degrees (approx).
- For repairing damaged bolts.
- Larger sized tool (size range 13 - 35mm) available, please see Laser Part No. 7856. Part of a set of 3 internal & external deburr/chamfer tools available, please see Laser Part No. 7884.
