STEEL & ALUMINIUM STRAIGHTENING MACHINE

GYSPOT COMBI PRO 230

Ref. 087705

INVEST IN THE FUTURE

The Gyspot Combi Pro 230 is a 2-in-1 dent remover. It can be used to remove dents from all steel and aluminium bodywork without the need for dismantling or removing trim. Cost-effectiveness and time savings are guaranteed thanks to its ergonomic gun for steel and its specialised gun for aluminium.

BENEFITS OF THE ALU DENT REMOVER

Microprocessor-controlled system with digital display:

- Voltage (adjustable from 50 to 200 V with memory function for the last displayed value), or power level from 0 to 10;
- Detection of the presence of a stud;
- Three-point copper earth connection suitable for the gun.

Technology: high-power capacitive discharge (66 mF) for welding M4 studs to any aluminium sheets (silicon aluminium and magnesium aluminium) that are in contact.

BENEFITS OF THE STEEL DENT REMOVER

There are just two settings to select:

- The power level (choose from 11 levels, from 0 to 10);
- The tool used (from a choice of 7 tools);
- **No need to set the time and intensity.**

Manual ignition system:

Manual gun: The weld spot is created manually by pulling the gun's trigger when the tool and the workpiece to be straightened are in contact.

ORIGINAL CONDITION

STEEL WELDING:

▪ A steel earth plate ⑤
(2 m detachable cable, Ø 70 mm²)

▪ 1 gun ④
(1 detachable cable: 1 x 2 m cable – Ø 70 mm²)

Multifunctional:
- welding of studs, rivets, rings and washers
- crimping function, sheet metal heating pen

▪ A complete box of accessories and consumables (ref 050075: Spotter consumables kit ①) 8m power cable.

ALUMINIUM WELDING:

▪ 1 gun ③
(3 m detachable cable, Ø 25 mm²) for welding studs Ø 4 – M4:
- Aluminium-magnesium
- Aluminium-silicon

▪ A clamp with 3 brass terminals,⑥ designed to fit onto the gun for direct and rapid contact with the area to be straightened.

▪ A complete box of accessories and consumables (ref: 050020: aluminium dent removal accessory kit ②)
